Six Popular Roses for Outdoor Planting

One-Year Plants, 6 for \$1.00. Two-Year-Plants, 6 for 2.00.

Golden Ophelia

Golden Ophelia It is sturdy, stiff-stemmed grower, with beautiful foliage, quite closely set, and glossy. The flower is of medium size, from a beautifully formed bud of bright, golden yellow. Has excellent texture; profuse in bloom; makes a marvelous "bush." We are very enthusiastic over this beautiful, true yellow novelty, which will rank high in its class.

Francis Scott Key The flowers are from large to very large, opening to a high center. The color is a magnificent deep red rose. Wherever it has been staged, this Rose has swept all competitors from the boards and secured every prize it has entered for. Grand for the garden.

Francis Scott Key

Pink Radiance

Radiance Color a brilliant rosy-carmine, displaying beautiful opaline-pink tints in the open flower. The form is fine; flower large and full with cupped petals. A fine variety, especially on account of its value as a summer cut flower variety. Very free in growth and production of bloom, has good habit; lasting qualities of the flower are wonderful.

La Champagne (H. T.) Strong, robust habit, with large, long buds of beautiful shape, which develop into good full blooms; color, bright chamois, shading to yellow with apricot center and peach-blossom reflex and yellow base.

La Champagne

White Maman Cochet

White Cochet A grand Rose. Identical with parent, Maman Cochet, the queen of all pink garden Roses, except in color of flower, which is snow-white sometimes faintly tinged with the faintest suggestion of pale blush. The flowers are large and very double, with petals of unusually heavy texture.

Crimson Queen Strong, upright grower, flowers large and full. Color a rich bright velvety crimson. A grand garden Rose as it is always in bloom.

Hybrid Tea Roses—Continued

Every One A Gem For Your Garden

Kaiserin Augusta Victoria It is a continuous bloomer, producing successive crops of buds, and formed with large petals of best substance; shows no center when fully open; color pure creamy-white.

Killarney The magnificent sturdy habit of growth, beautiful foliage, delicious fragrance and deep brilliant sparkling pink flowers makes this one of the most beautiful and popular roses ever produced.

La Champagne Strong, robust habit, with large, long buds of beautiful shape, which develop into good, full blooms; color, bright chamois, shading to yellow with apricot center and peach-blossom reflex and yellow base.

Lady Plymouth The color is a pearly, delicate but deep ivory-cream, faintly flushed, giving it a most piquant finish that is difficult to describe.

Mme. Butterfly A perfect harmony of bright pink, apricot and gold. Buds are medium in size, perfect for corsages, while the open flowers are lovely in form, texture and fragrance.

Mrs. Charles Bell It may be described as a shell-pink Radiance, and is a sport of that well-known Rose. It has no characteristics which make it distinct from Radiance except that it is shell pink. Mrs. Chas. Bell, Red Radiance and Radiance offer a range of color that will be welcome, and there are no finer garden Roses for America than these three.

Mrs. Aaron Ward One of the most delightful Roses of recent years in a color that catches the eye at once. Coppery-orange in the open bud, golden-orange when partly developed, pinkish-fawn of lovely shade when fully open, when it looks like a full, fluffy silk rosette.

Ophelia The queen of fancy roses. Color is delicate salmon-orange, tinted rose; buds and flowers are unusually attractive; very fragrant.

Rev. F. Page Roberts A glorified Duchess of Wellington, with more petals, better shape, and deeper, richer color. Coppery red buds of wonderful size and length, open into golden-yellow flowers, which are very, very double. The plants grow vigorously, with magnificent healthy foliage and branches freely.

Red Radiance Similar to Radiance in form and growth, except color, which is a fiery-scarlet. Excellent garden Rose as well as a good forcer. Form is fine, flower large and full cupped petals.

Roselandia Closely related to the beautiful Golden Ophelia but considered an improvement. Color is a golden orange suffused with a lustrous glow of apricot in the heart, frequently tinted red on the reverse of the outer petals. Buds are long and pointed, deliciously sweet scented. Very desirable for garden planting on account of its free flowering habit and rapid strong growth.

Souvenir de Claudius Pernet Very large, full flowers with long deep petals of the most striking sunflower-yellow, deeper in the center. Blooms early and late. When it has become established in your garden, its growth is strong and vigorous, with large, brilliant glossy green foliage, which is disease-resistant. It is not easy to get started, for like all yellow roses, it requires pampering, but is worth your greatest efforts. A beautiful glowing pure rich yellow which does not fade and certainly supplies the long-felt need in the garden.

Sunburst Has long-pointed buds. The color is orange-copper or golden-orange and golden-yellow; edge of petals lighter; all intense shades extremely brilliant in effect. Belongs in the class of Big Roses.

Templar Bud medium size; flower medium size, very lasting. Vigorous, upright, abundant and continuous bloomer. Clear, bright red, of exceeding double form. Strongly perfumed.

Wellesley The color is a beautiful shade of pink, the outside of the petals being bright and clear, with a silvery reverse. It is a very vigorous, healthy grower, carrying the flowers on long, stiff stems.

White Killarney The buds are exquisitely long and pointed, unfolding broad wax-like petals into enormous double flowers of pure snow-white which retain their freshness of form and purity of color.

White Radiance Dainty ivory-white warmed with a faint blush tint. Large, full petaled flowers are produced in great profusion on stiff, erect stems the entire season and well into the fall. Foliage is thick and leathery, pleasing light green. It has all of the delightful characteristics of its parent, the famous Radiance, which is the most popular rose in America.

Fine One-Year-Old Plants, 20c ea. Your Choice of Nine for \$1.50. Large Two-Year-Old Plants, 40c ea. Your Choice of 9 for \$3.00.

These are the original Ever-blooming Roses and are highly valued because of their exquisite dainty coloring and delicious tea fragrance, together with their remarkable free blooming qualities, flowering profusely as they do from June to November. They have great resistance to disease and leathery, glossy foliage. They are less hardy than the Hybrid Teas and need careful protection in cold climates.

Alexander Hill Gray Color is a deep lemon-yellow which intensifies as the blooms develop; flowers large, of great substance and perfect formation; it has a high-pointed center from which the petals gracefully reflex. We recommend it highly.

Blumenschmidt Pure citron-yellow, outer petals edged tender rose. Very full, double flowers; remarkably vigorous grower.

Clothilde Soupert Color a French white, deepening to a rosy-blush in the center, exceeding in distinctness of shadings the well known Malmaison. Its greatest value lies in its compact, vigorous habit and wonderful profusion of bloom. Form and substance of the flowers are so perfect that the hottest weather does not cause a deterioration of either, so that even in mid-summer a bouquet of splendid buds and open flowers can be obtained from this variety. Hardy with protection.

Etqile de Lyon Flowers are very large and double; buds are long and pointed. Color, beautiful chrome yellow, deepening at the center to pure golden yellow. Unusually rugged grower, proving hardy in quite severe climates.

Helen Good (Beauty Cochet) Delicate yellow, suffused with pink, each petal edged deeper; very chaste and beautiful. Remarkably free flowering, particularly in late fall.

Lady Hillingdon Handsome flowers of clear apricot yellow; hardy; of much vigor, and with an autumn blooming habit.

Marie Guillot This beautiful Tea Rose continues in popular favor, and still maintains its position as one of the best white Roses of its class; flowers of an unusual style, entirely double to the center; very sweet scented.

Mlle. Franziska Kruger The striking color of this handsome Rose places it at once in the front as a bud producer in the open air. In its shading of deep coppery-yellow it stands unique and distinct from all others. The flower, when open, is of good size and very symmetrical. One of the finest Roses to plant in masses and clumps.

Souvenir de Pierre Notting The bloom is very large, perfectly full, elegant form; has a beautiful long bud; the colors are very bright, distinct and clear and have no unpleasant tones—orange-yellow, bordered in carmine-rose.

Fern Roosevelt

THE "ROOSEVELT FERN"—In general characteristics, it resembles the Boston Fern, but with two points of great excellence over that variety. GLADIOLUS "The Glory of the Garden"

THIS class of summer-flowering bulbs is doubly valuable for the show of bloom, and for its generous supply of cut-flowers. Gladiolus flowers last longer when cut than most any other flowers, and develop in water to a greater perfection than if left on the plant. Bulbs should be planted from the middle of April on into May throughout the Northern States, a second planting after two or three weeks insuring a more even succession of bloom. Set bulbs 2 to 4 inches deep and 2 inches apart in the drills, single rows 12 inches, and double rows 18 inches apart. Gladioli do well 4 to 6 inches apart each way, when planted in beds.

TRUE ARISTOCRATS FOR YOUR GARDEN

ADOLPHE ROUSSEAU—(Dessert & Mechin, 1890.) Very tall, strong grower bearing rather loose, sometimes semi-double flowers of deep garnet. Very fine for the garden, where its height and color make it conspicuous. Early midseason. **75c each.**

EDULIS SUPERBA—(Lemon, 1824.) Crown type; very early. This might well be called the Decoration Day Peony, for it is in full bloom for May 30th. A most beautiful bright clear pink with silvery reflex that under good culture measures from seven to eight inches across. One of the most valuable Peonies. June rose fragrance. **60c each.**

FESTIVA MAXIMA—(Millez, 1851.) Rose type; early. This is not only the finest white in existence, but many regard it as the queen of all the Peonies. It combines enormous size with wondrous beauty; often seven to eight inches in diameter. Clear carmine spots on edge of center petals. For over sixty years it has held first rank, and is still the standard of perfection by which all other Peonies are judged. The most popular white Peony for cut flowers. June rose fragrance. **60c each.**

FELIX CROUSSE—(Crousse, 1881.) Rose type; late midseason. Its large, globular flowers, solid and compactly built from edge to center, are a rich, brilliant, dazzling ruby-red. Exceptionally fiery, bright and effective. **75c each.**

FLORAL TREASURE—(Rosenfield.) Rose type; early midseason. Very large, full flowers. Clear, even pink, shading lighter at the center. One of the most popular cut flower varieties. **60c each.**

GOLDEN HARVEST—(Rosenfield, 1900.) Bomb type; midseason. A most striking variety producing large, tri-colored bloom. The guard petals are bluish-pink with creamy-white center; center of flower overlaid and tipped with carmine. It combines cream, gold, white, pink salmon, peach and apricot, the color effect of the flower being creamy-pink; strong, delicate fragrance. **60c each.**

LA TULIPE—(Calot, 1872.) Semi-rose type; midseason. Enormous, globular, fragrant flowers, delicate bluish-white, shading to ivory-white, with red tulip markings on outside of guard petals. **75c each.**

LADY ALEXANDRA DUFF—(Kelway, 1902.) Lovely French-white—that is to say, not a snow-white, although when fully opened it is quite white; in the young stage tinted with a very fresh, delicate pale shade of what is commonly called "blush" or palest pink. The central flower is a double flower of rather flattened circular form, and the central petals have a very small touch of carmine. The side flowers (which are freely produced and which open after the central flower), come in semi-double saucer-shaped form, exposing the anthers. The back of the flower near the stem is flushed with pink. Tall and robust. **\$1.00 each.**

LIVINGSTONE—(Crousse, 1879.) Rose type; late. Very full imbricated bloom; both buds and flowers are large and beautiful. Color pale lilac-rose with sheen of silver; very free sure bloomer in clusters; upright, erect grower; fine cut flower variety. One of the prize winners. **75c each.**

L'ECLATANTE—(Calot, 1860.) Bomb type; midseason. Flowers very double and full; color deep, brilliant velvety-crimson. It makes a handsome plant, every flower standing up straight and erect well above the foliage. We think this one of the finest red Peonies. **60c each.**

MADAME DE VERNEVILLE—(Crousse, 1885.) Bomb type, early. One of the most charming varieties on the market. Guard petals are pure white, very large and folding over the flower; the blooms are very full and double, of the purest white suffused with daintiest blush except a few cream-colored petals and four red flakes on central petals; exceptionally free. We have counted sixty-five large, perfect blooms on one plant open at the same time. Rose fragrance. **60c each.**

MEISSONIER—(Crousse, 1886.) (Syn. American Beauty.) Bomb type; midseason. Very brilliant crimson; full double flowers on stiff, wiry stems; the stems may sometimes have short crooks in them, but they are never weak. The coloring is wonderfully rich and brilliant. **60c each.**

MONSIEUR JULES ELIE—(Crousse, 1888.) Bomb type; early midseason. This is the king of all Peonies, and is without question M. Crousse's masterpiece. Immense globular, very full flowers. Color an ideal glossy lilac-pink, shading to deeper rose at the base, the entire flower overlaid with a sheen of silver that fairly shimmers in the sunlight. Monsieur Jules Elie is claimed by many to be the largest of all Peony flowers. When cut in the bud, a good keeper, thus fine for cut flowers. **60c each.**

PRESIDENT TAFT—(Syn. Reine Hortense.) Rose type; midseason. A vigorous, strong grower, a profuse bloomer, every shoot being crowned by a big bloom. The color is a delicate Hydrangea-pink, completely enveloped in a halo of angelic white. Very fragrant. The only Peony we know that has stripes on the face of the flower. **75c each.**

SARAH BERNHARDT "The Divine Sarah"—(Le-moine, 1906.) Semi-rose type; late midseason. The strongest growing of all Peonies without exception; flowers of remarkable size and freshness in huge clusters, full and double, of unusual perfection of form; extremely large petals that are imbricated, twisted and fimbriated; color apple blossom-pink with each petal silver tipped, giving the appearance of a distinct border of pure white; fragrance agreeable and penetrating, magnificent. It has no faults. **\$1.00 each.**

HARDY FERNS

These are very useful for growing close to houses and in corners which are too shady for other plants.

Most ferns do best in a light soil containing much vegetable matter, and it is always best to work a considerable amount of leaf mould into the soil of a fern bed.

While the native ferns are, of course, perfectly hardy, most of them are better off with a light covering of leaves in winter.

35c each; 3 for \$1.00.

CHRISTMAS FERN—It is one of the very best species for growing as an individual specimen and ranks with the Ostrich and the Osmundas in size and vigorous beauty. Plant the crown level with the surface and if massed effects are desired, 12 inches apart.

OSTRICH FERN—(Onoclea Struthiopteris)—Growing in a crown, fronds 2 to 4 feet by 6 to 10 inches wide; a very erect, handsome species, graceful as a palm. Use lots of manure, leaf mould or well rotted peat and it will multiply by underground runners, especially so in moist sandy or peat soil. Plant crown level or one-fourth of an inch above surface and mulch in winter. Its vase-like masses of foliage are dark green and it is one of the tallest of our ferns and should be planted well back.

INTERRUPTED FERN—(Osmunda Claytoniana)—A large fern growing in a crown 2 to 3 feet high, 8 inches broad, clothed with rusty wool when young, very beautiful, cinnamon colored leaves. Does well under cultivation in high, shady or open places.

VIOLETS

Of all delightful perfumes, that of the Sweet Violets is the most delicate and pleasing. The leaves are small, lance shaped and glossy green with metallic sheen at the approach of winter. Full exposure to the sun is required to develop and retain the brilliant coloring at all seasons.

Dependable Flower Seeds

GENERAL CULTURAL DIRECTIONS—Most flower seeds germinate well in fine, sandy loam, partly protected from the sun. Heat and moisture are the two essential points to start life in seeds. A general and fatal error is to start the seed too deep; small seeds should be barely covered with fine earth; large seeds by about half an inch. After sowing, the ground should be watered with a very fine sprinkler regularly. Many seeds are killed by drought.
